A Digital Marketing Ecosystem for Pharmaceuticals

Digital Marketing

In 2010, for the first time, online digital media spend exceeded print media

- Digital World around us is rapidly changing:
  - The way people seek information is changing
  - Emerging Social interactions - interactive, collaborative, social model
  - Online channels are expanding – mobile boom!
  - Media formats, richness, and interactivity level is rapidly evolving
- Scattered Digital Marketing technology solutions across organization
  - Different for each brand / product
  - Different for each channel – eMail, Web, Mobile, Social, etc.
  - Fragmented Digital Media Assets
  - Inconsistency and low reuse
- Change is required to deliver a cohesive Digital Marketing Strategy
  - Need for an integrated technology approach
  - Engage consumers in a new and interesting ways of conversation with consistency

Social Media: A New Way of Digital Marketing

Social Media presents innovative ways of engaging with your brands. It is also a way gather collective intelligence.

Social Media Analysis	• Generate insights by Listening & Analyzing the social channels such Twitter. Facebook, blogs, etc. • Monitor reactions to brands and diseases - decipher sentiment analysis
Presence on Social Media Outlets	• Presence on Facebook, Twitter • Blogs mostly at the corporate level • Social Media Campaigns, Generate Ideas & encourage social polling
Online Video	Publish promotional , educational videos User Generated Video – invite patients to share their stories – moderation required
Patient Communities (Non-Brand Controlled)	• Patients connecting with each other taking each other's advice. Listen to such communities.
Brand Sponsored Patient Communities	Targeted communities - dedicated to help people of common interest groups to learn & share Monitor all comments in real time and publish only after reviewing For unreleased drugs, start or "sponsor" a generic disease / patient community Some can conservative approach - Limited set of choices rather than open free form content
