- Service all segments of HLS: Bio-Pharma, Medical Devices, Healthcare Payers, Government and Providers
- 10% of the total MphasiS Revenue
- 20+ Biopharmaceutical clients
- 5 of the top 10 Pharmaceuticals are clients
- 2 of the top 5 Biotechs are clients

Key Observations

MPHASIS an HP company

Real World POV	Business and IT POV
Patient Centricity • Effects of multichannel and digital marketing, social media and accessing the core customer and consumer – the contemporary idea of an e-patient • DTC enables both an increased level of closeness to customer while also heightens risk and rapidity of information flow	**Consumerism**
M&A and BD&L vs. Internal Productivity • Firms now question what is the "core" parts of their business and its operation and debate what to in-source versus out-source • Firms seek partners amongst their industry peers for research, development, manufacturing, sales, and/or marketing	**Organic vs. Inorganic Growth**
Rising R&D Costs • Expected creeping of the cost of doing business in knowledge management and information-intense industry • Explosion of novel data and insight in discovery research	**Cost of Innovation**
Patent Expirations and Product Pricing • Many expirations are to happen in the near future • Legacy product lines actively search for line extensions while generics and biosimilars present viable threats • New and emerging public healthcare models are changing the way firms work with payors and rapidly affect where, how much, and who	**Licensing and Pricing Models**
Global Commercial Excellence • Firms sincerely need to ensure both Sales Excellence and Customer Excellence – towards a whole host of stakeholders (patients, physicians, providers, formularies, payors)	**Emerging Marketing and Sales Models**

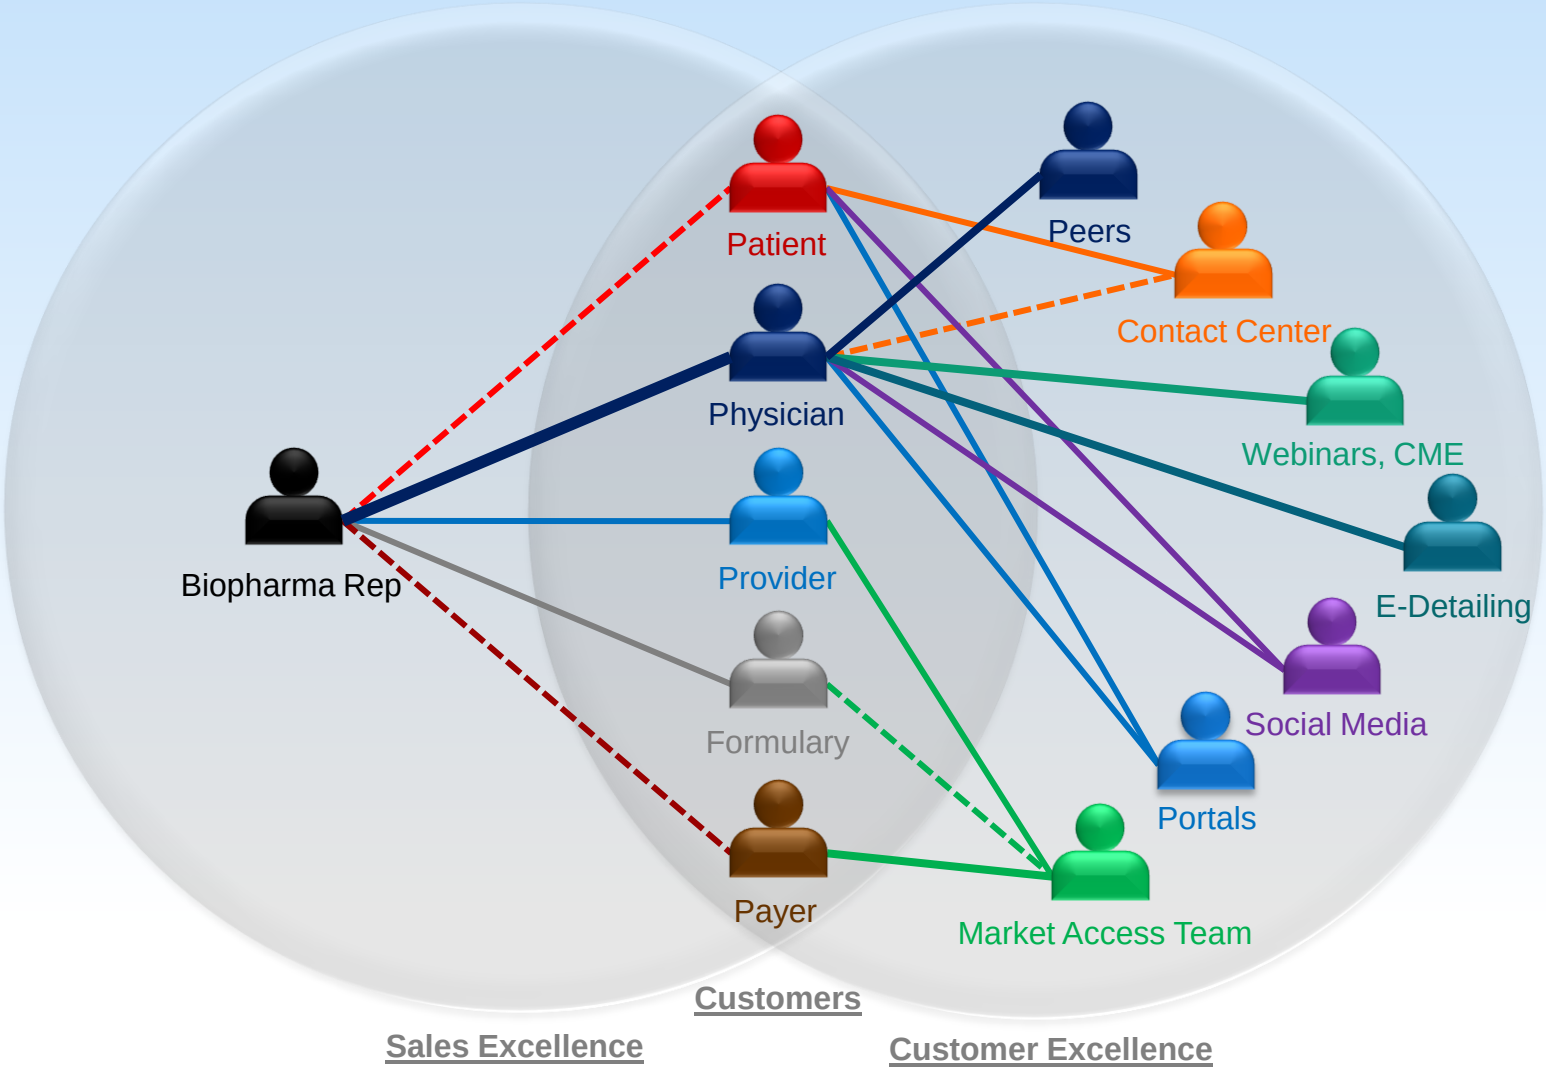
Commercial Excellence

Core Definition

Commercial Excellence force, embracing all commercial interactions with customers. The ultimate aim is to optimize impact by maximizing profit contributions on all levels. COX comprises of **(COX)** goes far beyond the activities of sales :

- **Sales Excellence**: Improves the performance of the traditional biopharmaceutical sales model
- **Customer Excellence**: Seeks to maximize the impact of interactions with an growing group of customers and stakeholders

Interactions



Dimensions

Customer Relationship Management (CRM)
Key Account Management (KAM)
Sales Force Capability Enhancement (SFCE)
Targeting (Tar)
Business Efficiency Management (BEM)
Resource Deployment & Development (RDD)
Promotional Mix (PM)
Marketing Excellence (ME)
Alternate Sales Channels (ASC)
Sales Excellence
Profit
Customer Excellence
Commercial Excellence

Customer Relationship Management

Place the customer's needs first

- Deeply understand your customers
- Align organization's capabilities to deliver better value to customers

Impact

- Addresses prospective and attractive customers through a proper channel
- Decreases customer service costs and improve returns
- Improves customer retention by providing customized and tailor-made offerings

Key Account Management

Manage the key stakeholders

- Physician
- Formulary/Pharmacy
- Provider
- Payer

Impact

- Account specific focus
- Account based strategy
- Customized/flexible pricing strategy
- Tailored messaging and communication
- Secure customer commitment and future customer access

Sales Force Capability Enhancement

Enable sales force

Accurate Product/Customer/Market Data
Availability even on an offline mode
Mobile solutions

Impact
- Availability critical business data
- Improved planning
- Enhanced customer engagement
- Better Response
- Increased returns

Targeting

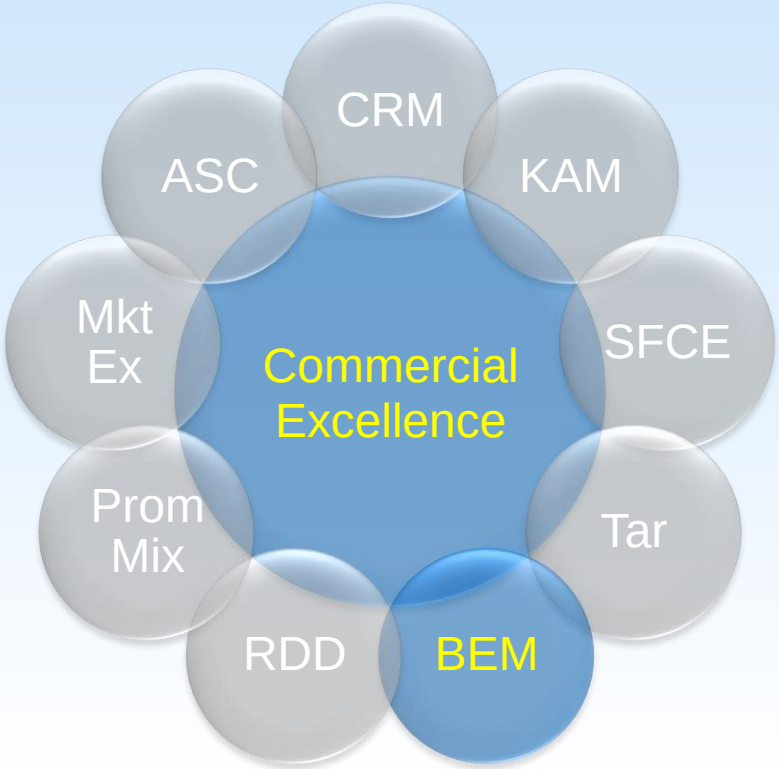
Right profiling for right positioning

- Customer profiling
- Product positioning
- Right messaging

Impact

- Right reach and penetration
- Better customer insights
- Message/communication optimization
- Sustained CRM

Business Efficiency Management



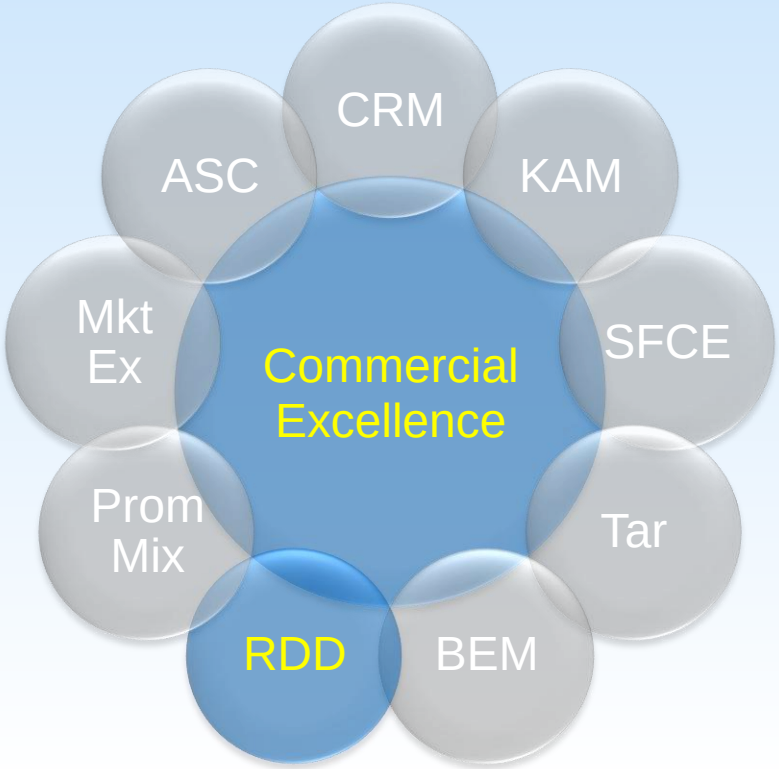
Focus on effective KPIs

- Identifying effective KPIs
- Gaps in effectiveness measurement
- New KPIs

Impact

- New or innovative value delivering KPIs
- Consistent evaluation of product knowledge/selling skills
- Performance management

Resource Deployment and Development



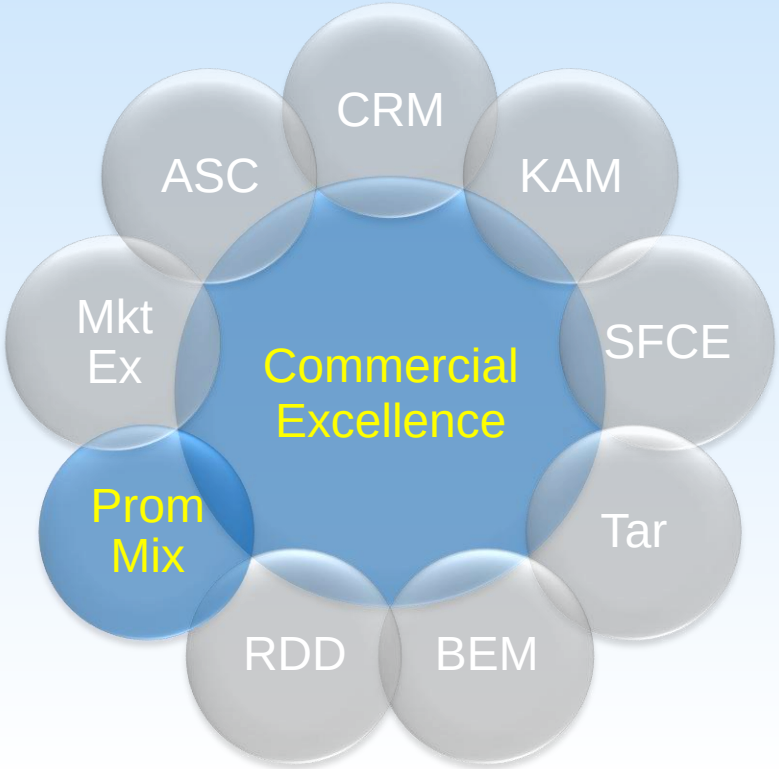
Bringing right practices

- Right resources
- Appropriate orientation
- Proper development plan

Impact

- Improved PMP(per man productivity)
- High employee satisfaction levels
- Consistent learning
- Right recognition
- Enhanced organization-employee alignment

Promotional Mix



Optimization of promotion mix

- Personal Selling
- Sales promotion
- Advertising
- Public relations

Impact

- Optimal utilization of conventional sales force and alternate channels
- Right channel for right customers
- Right approach for right
- Communication
- Right methodology to enhance equity(brand or corporate)

Marketing Excellence

Successful management of 4Ps

- Product
- Price
- Place
- Promotion

Impact

- Effective execution of strategy
- Maximizing returns
- Appropriate PLC management
- Optimal stakeholder management

Alternate Sales Channel

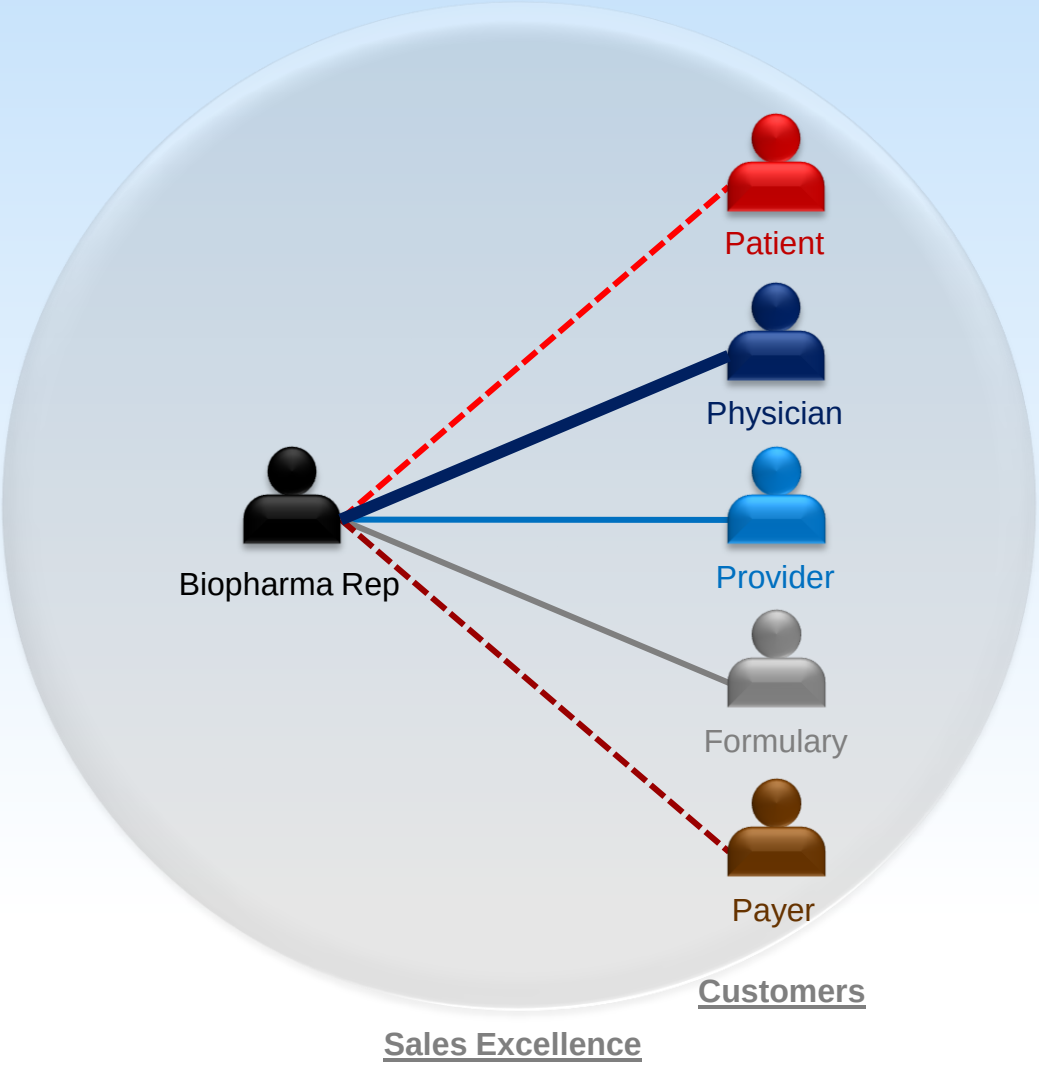
Other than 'Conventional channel'

- E-detailing
- Webinars
- Focus group meetings
- Panel discussions
- Social media
- DTC

Impact

- 360^0 customer experience
- Understanding customer environment
- Customized customer engagement
- Instant feedback
- Customer excellence

Accelerators for Sales Excellence

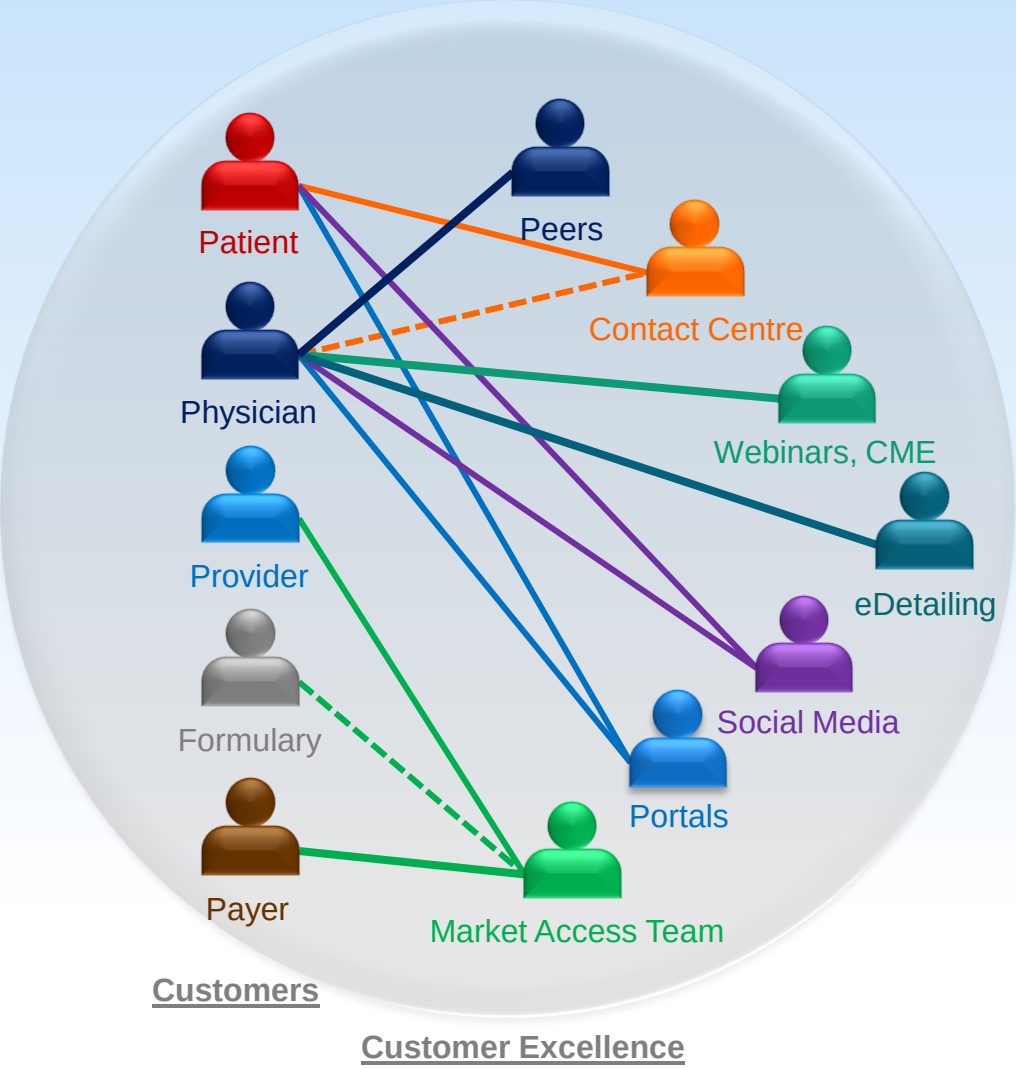


- Dynamic Detailing
- Interaction Analytics
- CRM
- SFA
- Sales Analytics
- eLearning

Accelerators for Customer Excellence

MPHASIS
an HP company

- Multi-channel Marketing
- Web Analytics
- Dynamic Mail Template
- Social CRM
- Social Media Analytics
- Mobile Apps

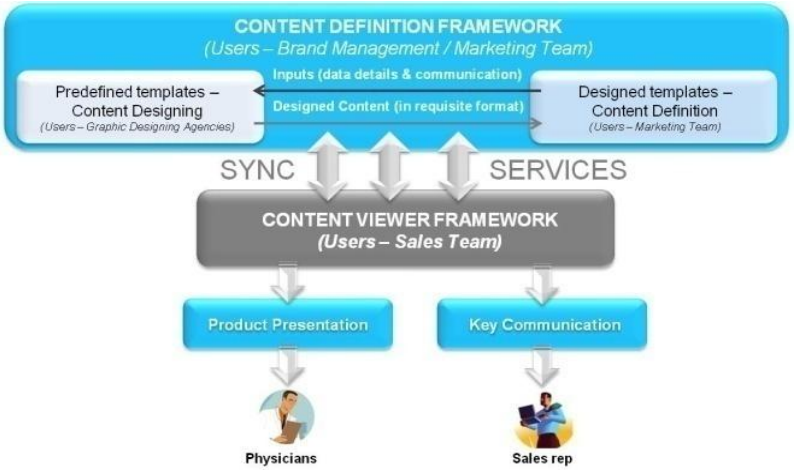


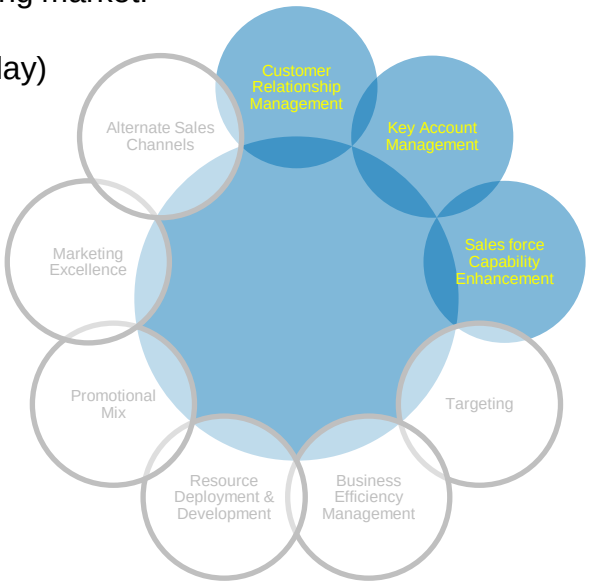
Dynamic Detailing

Accelerator

Dynamic Detailing

- Brand and Product Managers conveniently define product content as per market strategy for the therapeutic area, indication, and with precision and individual authentication .
- The “Content Definition Framework” is unique tagging of all content (creates a marketing ontology).
- Sales Teams additionally define and further personalize content for individual customer interests.
- Ad-hoc inclusions and deletions are done based on the specific need or customer- market situations
- A predecessor solution successfully deployed for a top-5 pharma in an emerging market.
- The convenience of an iPad for ease of travel (mobility) and speed (rapid display)





Interaction Analytics

Accelerator

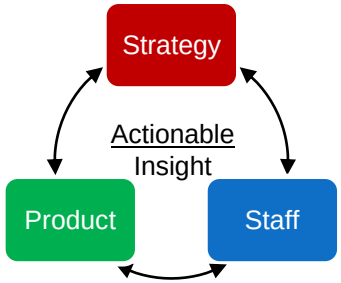
Interaction Analysis

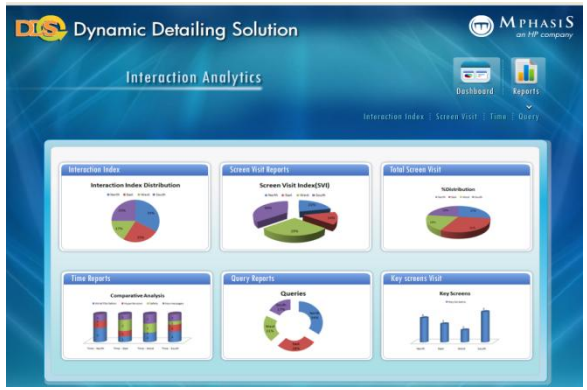
- Use meaningful KPIs:
  - Interaction Index: A measure of weight of the Interaction between representative and physician
  - Screen Visit
  - Time
  - Query

- Have rapid and ready access to these, including connection to the whole commercial operations IT infrastructure (Incentive compensation systems, CRM systems, Scheduling and Visit systems, Sales data warehouses, National/District/Territory report/view systems, etc.)

- Have a fully mapped /aligned sales strategy to both product and to staff
  - Gain meaningful intelligence from the use of simple metrics
  - Produce actionable insights:

    From simplicity is born clear, articulate and meaningful results



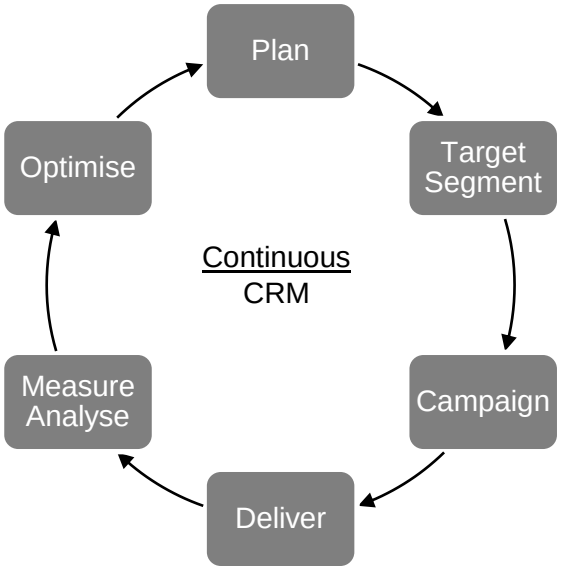


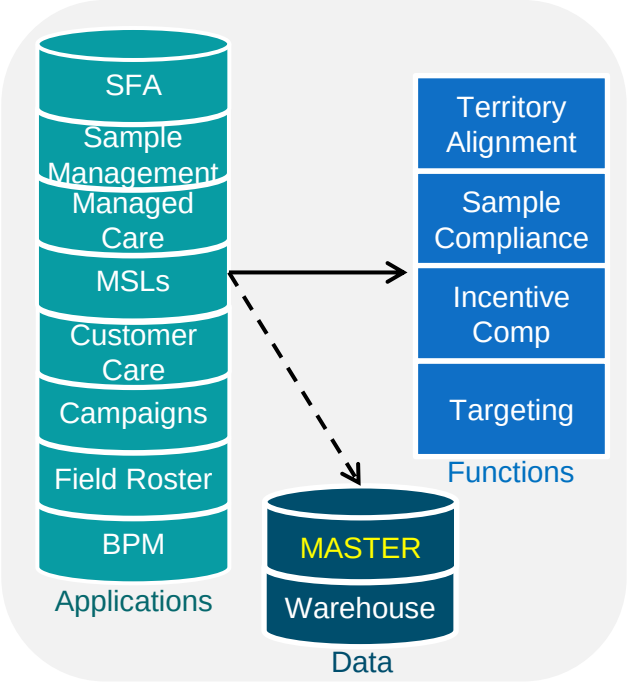
CRM Systems

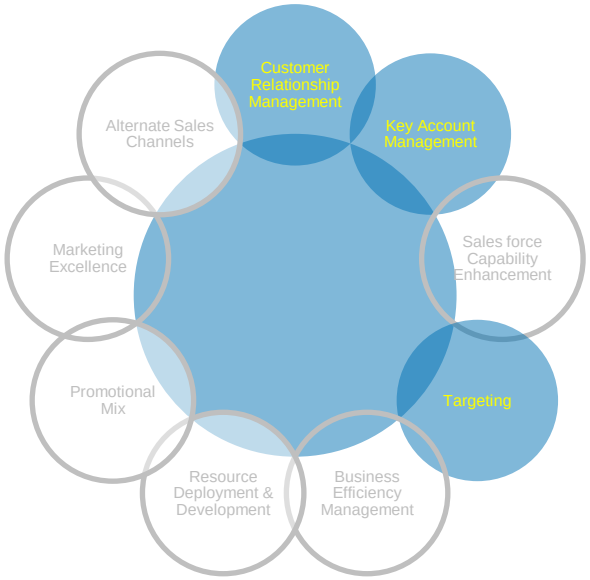
Accelerator

CRM

- CRM systems are the most common enabling technology, but here are some observations:
  - CRM is the continuous execution of the process. Keep doing it.
  - Procure an enterprise view (application, functional, and data architecture) that fits your needs
  - Eventually operate a system that is not simply a bunch of “connectors”
    - Most solutions are functional-centric (business area). Get one that is customer-centric.
    - Keep a strict vision of “customer data” at it’s core.







eLearning Systems

Accelerator

eLearning Systems

- Continuous Improvement through active learning academies and online participatory education expose some known gaps:
  - Conventional theory states that solid training, best culture, and strong recruiting and retention programs provide a strong sales force. Known evidence suggests that pharma sales motivational drivers are more aligned towards sales compensation and organisation structure

- Developed systems with true “learning for betterment” features:
  - Course schedules, interactive learning, activity based education, grade management
  - Links between the product knowledge links with effective physician communication
  - A practicum of dynamic detailing
  - Real-time interface and content syndication
  - Personalization and unified dashboards

Multi Channel marketing

Accelerator

Multi Channel Marketing

- Downsizing trends makes it very evident that industry is looking at alternate channels to engage customers
- 88% of all physicians use the internet to access biopharmaceutical info
- Increasing use of customer service portals (brand websites/portals)
- Rise of physician-only social networking
- Blogging physicians humanizing the industry

- One dedicated resource pool dedicated to develop, enhance, and maintain websites/portals
- Mobile Web Apps are live, prototypes, and in POCs
- Gauge campaign or communication effectiveness in the web (FAMS)
- Prototypes and PoCs in Social Media
  - Discussion/Review trends
  - Mention/buzz trends
  - Competitor analysis
  - Payer & reimbursement trends
